

## DOC.AI – Maternal Risk Prediction Report

Patient Name: Tissa Age: 18

Date: 25-12-2025 13:27

### Clinical Parameters

SystolicBP	DiastolicBP	BS	BodyTemp	HeartRate
70.0	50.0	0.0	85.0	60.0

### Prediction Summary

**Result:** ■ Pregnancy Complication Risk Detected

**Risk:** 100.00%

### HbA1c Interpretation

Maternal age is the strongest indicator of fertility-period risk, while blood pressure and blood sugar determine pregnancy-related complications. Avoids unnecessary panic or treatment

Doctor's Conclusion:

Based on the provided clinical parameters, further evaluation is advised to our best Gynecologist.
